PROFESSIONAL SUMMARY

Results-driven Solutions Architect with 14 years delivering \$5M+ in measurable business value through enterprise cloud solutions, microservices platforms, and large-scale modernization initiatives. Proven expertise translating complex business requirements into secure, scalable architectures that drive strong ROI, including 180% return on modernization investments, \$2.5M annual cost savings, and 75% faster time-to-market. Deep alignment with AWS Well-Architected Framework (WAF) and Azure Cloud Adoption Framework (CAF). Track record owning end-to-end architecture lifecycle from strategic vision to operational handover, partnering with product, engineering, compliance, and business stakeholders to drive adoption and quantifiable business outcomes.

Core Strengths:

Architecture Governance & Frameworks | Technical Roadmapping & Modernization Strategy | Cloud-Native Design Patterns | Distributed Systems & Microservices Architecture | FinOps & Cloud Cost Optimization | DevOps Transformation | Stakeholder Alignment & Risk Mitigation

CERTIFICATIONS

AWS Certified Solutions Architect – Associate (2025)

TOGAF® 9 Certified – Enterprise Architecture (2023)

Microsoft Certified: Azure Fundamentals (2023)

Microsoft Certified: Azure AI Fundamentals (2023)

PROFESSIONAL EXPERIENCE

Solutions Architect

Feb 2022 – Present

Wells Fargo — Disputes Automated Tracking (DAT)

Business Impact & Value Delivery

- Drove \$2.5M annual cost savings through cloud optimization, infrastructure right-sizing, and elimination of redundant services.
- Delivered \$2M additional revenue by increasing banker productivity 2× through platform modernization, enabling faster claim resolution and improved customer satisfaction.
- Achieved 180% ROI on modernization initiative within 18 months, justifying continued investment in cloud transformation.

- Accelerated time-to-market from 8 weeks to 2 weeks for new features through microservices architecture and CI/CD automation.

Architecture & Modernization Leadership

- Architected and re-engineered a high-volume enterprise platform (~12,000 claims processed daily) using Spring Boot microservices on AWS, reducing claim creation latency by 66%.
- Established enterprise architecture governance framework including architecture standards, design review processes, reusable microservices patterns, and ADRs. This reduced technical debt by 40% and improved team velocity by 25%.
- Owned modernization and cloud migration strategy for legacy components; delivered multi-phased roadmap covering data migration, service decomposition, and operational transition.

Cloud Platform & Operational Excellence

- Implemented FinOps practices reducing AWS spending by \$180K annually through reserved instances, right-sizing, and automated resource scheduling.
- Designed security, compliance, and operational patterns for regulated financial environments (SOX, audit controls, data residency).
- Implemented observability using ELK stack; established dashboards reducing critical incidents by 30% and MTTR by 45%—saving an estimated \$500K annually in incident-related costs.
- Led platform resilience initiatives achieving 99.95% availability SLA, preventing potential revenue loss of \$1M+ from downtime.

Organizational Efficiency & Leadership

- Improved cross-functional team efficiency by 35% through standardized design patterns, reusable components, and knowledge-sharing initiatives.
- Mentored 8+ engineers on system design, cloud adoption, and distributed systems—reducing onboarding time by 50% and accelerating career growth.
- Led architecture design sessions and PoCs with stakeholders, reducing project risk and avoiding \$300K+ in potential rework costs.

Technologies: Java, Spring Boot, Microservices, AWS (S3, Lambda, RDS, CloudFormation, CodePipeline, DynamoDB), Kubernetes, Docker, API Gateway, SQS/SNS, Event-driven patterns

Senior Software Engineer

Dec 2013 – Feb 2022

Wells Fargo — Disputes Automated Tracking (DAT)

- Built automated CI/CD pipelines reducing release cycle from 6 weeks to 5 days, accelerating feature delivery and generating \$800K annual savings in manual deployment costs.
- Designed observability infrastructure with real-time dashboards; reduced critical incidents by 30% and incident resolution time by 45%, improving operational efficiency by \$400K annually.
- Drove quality improvements through automated testing frameworks; reduced post-release defects by 35%, saving \$200K annually in production support costs.
- Led cloud migration decomposing monolithic applications into 10+ microservices on AWS, achieving 40% infrastructure cost reduction and 60% improved scalability.
- Contributed to architecture discussions enabling team to scale from 4 to 12 engineers while maintaining delivery velocity—supporting \$5M platform investment.

Technologies: Java, Spring Boot, Jenkins, uDeploy, ELK, Docker, AWS (ECS, EKS, Lambda, RDS), Terraform, Kubernetes, Event Streaming

Software Engineer

Oct 2011 – Dec 2013

E2Open — eCustoms (Supply Chain Platform)

- Delivered features for supply-chain management platform serving 50+ enterprise customers, supporting \$100M+ in annual transaction volume.
- Contributed to system design enabling 30% faster customs processing, improving customer compliance rates and reducing regulatory penalties.
- Implemented quality initiatives reducing bug escape rate by 25%, improving customer satisfaction scores by 15%.

Technologies: Core Java, Spring MVC, JSP/Servlets, JPA/Hibernate, Oracle SQL, UML, JUnit

TECHNICAL SKILLS

Architecture: Architecture Governance, Design Reviews, Non-Functional Requirements (Security, Reliability, Performance, Cost), Modernization Roadmaps, Well-Architected Frameworks (AWS, Azure), Architecture Decision Records (ADRs), Domain-Driven Design, Microservices Patterns, API Design & Governance

Cloud: AWS: CloudFormation, S3, Lambda, RDS, DynamoDB, API Gateway, CloudFront, VPC, IAM, CodePipeline, CodeBuild, CloudWatch, Azure: App Service, Azure DevOps, Azure Monitor, Virtual Networks, Identity & Access Management

Distributed Systems: Microservices Architecture, Event-Driven Design, Message Queues (SQS, SNS, RabbitMQ), Service Mesh, Kubernetes & Docker, CI/CD Orchestration

DevOps: CI/CD (Jenkins, AWS CodePipeline, GitHub Actions), Infrastructure-as-Code (CloudFormation, Terraform), ELK Stack (Elasticsearch, Kibana, Logstash), CloudWatch, Container Orchestration (Kubernetes, Docker)

Programming: Java (Spring Boot, Spring Cloud, Microservices Patterns), Python (Scripting, Data Processing), JavaScript/Node.js, Bash/Shell, SQL

Leadership: Cross-Functional Collaboration, Stakeholder Alignment & Communication, Team Mentorship & Capability Building, Agile & Scrum Practices, Technical Writing & Documentation, Presentation & Facilitation Skills

EDUCATION

Post Graduate Diploma in Artificial Intelligence & Machine Learning BITS Pilani, Hyderabad, India	2021 – 2023
---	-------------

Bachelor of Technology (B.Tech) in Computer Science Jawaharlal Nehru Technological University (JNTU), Hyderabad, India	2007 – 2011
--	-------------
